Schedule

EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

The explosion-proof plug and socket model BCZ85-././ series consist of a plug and a socket in type of explosion protection 'db' for use in explosive gas atmospheres, and in type of explosion protection 'tb' for use in explosive dust atmospheres. The plug and sockets are mechanically/electrically interlocked preventing the separation of the plug and socket when the contacts are energized. The enclosures of the plug and the sockets are made of die-casted material ENAC-ALSi12(b) (ZL102). The plug and the sockets are provided with cable entry openings.

For nomenclature and other information, see the Annex to this certificate.

SPECIFIC CONDITIONS OF USE: YES as shown below:

The ambient temperature range is limited to -60 °C...+60 °C.

The width of flameproof joint is more than the minimum values specified in IEC 60079-1 standard. If needed, repair of the flameproof joints must only be made in compliance with the structural specifications provided by the manufacturer. Repairs must not be made on the basis of values specified in table 4 of IEC 60079-1:2014.

Before application, separate IECEx certified Ex db IIC Gb or Ex tb IIIC Db IP66 (as applicable) cable glands and stopping plugs must be applied, rated minimum IP66, suitable for the conditions of use and correctly installed.

Only use cables suitable for a service temperature greater than 90 °C.

The enclosure construction contains non-metallic parts with a potential electrostatic charging hazard. See manufacturer's Instructions
